Meet & Greet

By Lauren Dierker, Leah Holden, and Anne Oursler

Welcome to Halligan! What's Your Name?

Welcome or Surveillance?

- We hope Meet & Greet will help people feel welcome
- It's a neat application of facial recognition and retraining on the fly
- It could also be used to track people, which might make some feel uncomfortable
- But it can only learn you if you give it your name

Architecture

Libraries

Facial Detection

Facial Recognition - EigenFaces

Future Goals

- Natural language processing
- Face-height camera
- Roaming behaviors
- Reasonable number of welcomes**

**Right now will incessantly welcome you until you leave. You will feel welcome. Or else.
